Steve Spillette is an Urban Development Strategist with diverse experience in real estate and urban planning. A native Houstonian, Steve joined the San Francisco office of the national real estate consulting firm Economics Research Associates after completing his undergraduate degree at Stanford. He assisted in performing a variety of market studies and financial pro-forma analyses for both private and public clients related to single family and multifamily residential, retail, office, industrial, hotel, meeting facilities, and golf, as well as significant public sector studies related to major investments and strategic initiatives. He focused on transportation and land use issues in both academic and professional work while attending the Community and Regional Planning program at the University of California at Berkeley.

Upon his return to Houston, Mr. Spillette joined the Uptown Houston Improvement District as Director of Planning and Development, conducting the District's economic, market, and tax revenue research, packaging his analysis in District marketing and public information documents. He also was responsible for creating and managing the District's annual operating budget and monitoring District property values for revenue forecasting purposes. He was instrumental in creating the planning documents leading to the creation of the Uptown Houston Tax Increment Reinvestment Zone.

At Texas A&M University, he worked as a graduate assistant at the Real Estate Center and published several technical reports as well as articles in the Center's periodical *Tierra Grande*. In 2001, he formed his firm, Spillette Consulting, which merged with CDS in 2013. Mr. Spillette is a member of the Houston chapter of the Urban Land Institute and Congress for the New Urbanism.

Mr. Spillette's recent professional work includes:

- Community Housing Studies: Brownwood, Kerrville, Borger, Sweetwater, New Braunfels, Odessa, Bartlesville Downtown, San Angelo, Levelland, San Patricio County, Southern Brazoria County, Ardmore
- Comprehensive and Community Plans: Bee Cave, Lufkin, College Station, Pflugerville, Georgetown, Baytown
- Revitalization market studies: North Pasadena, Old Town Lewisville, Downtown Laredo
- Livable Centers: NASA Area, Energy Corridor, Near Northwest, Cypress Creek Pkwy, Hurst Bellaire, International District, Mont Belvieu
- Transit-Oriented Development: METRO station area market assessments, Uptown Houston BRT
- Transportation Studies: West Houston Mobility Plan, Fort Bend Rail Bypass, Toll Road Traffic and Revenue Study Projections
